---

## PROFESSIONAL SUMMARY

Versatile software development professional bringing a dynamic skill set and dedication to solving problems. Always striving to foster collaboration, and innovation while continuously seeking opportunities to cultivate professional and personal growth.

## TECHNICAL SKILLS

Java, HTML, CSS, JavaScript, Python, C, Spring Boot, Vue.js, JDBC, Table Design, SQL, PostgreSQL, E/R diagrams, Agile, Unit Testing (JUnit), Integration Testing, Git, IntelliJ

## TECHNICAL EXPERIENCE/PROJECTS

### Medical Scheduling App

Comprehensive platform connecting doctors, pharmacists, and patients, facilitating seamless online scheduling, appointment management, and transparent prescription cost tracking. Leveraging an agile development methodology, the app is powered by Vue.js for dynamic frontend interactions and Java backend with Spring MVC model, while utilizing JDBC API for smooth integration with Postgres, ensuring efficient database operations.

### Portfolio Website

Front-end portfolio site with easy navigation via a top bar, seamlessly transitioning between profile, about, experiences, skills, and contact sections. Crafted with HTML elements and attributes for structured efficiency, and CSS with flexbox for smooth layout design, ensuring user-friendly browsing.

### TEnmo Payment App

Online payment service designed with Java, Spring Boot, and PostgreSQL, enabling users to transfer 'TE bucks' among friends. This platform empowers users to request and send money, while providing easy access to transaction history, all supported by a RESTful API server and command-line application.

## WORK EXPERIENCE

### Barista

Feb '23 - Oct '23

#### Starbucks | Bryn Mawr, PA

- Collaborated effectively with colleagues to implement new beverage preparation techniques, resulting in a 30% decrease in average order fulfillment time and a 10% increase in overall store productivity compared to previous years
- Elevated the craft of beverage preparation, skillfully handcrafting over 200 unique drinks each month to provide customers with an immersive and personalized barista experience
- Implemented a systematic inventory management approach, closely monitoring levels and promptly restocking supplies, resulting in a 10% decrease in waste and a 15% reduction in inventory-related errors

### Physical Therapy Intern

Jul '22 - Feb '23

#### Einstein Medical Center | Philadelphia, PA

- Enhanced patient treatment plans by applying analytical thinking and systematic problem-solving skills, resulting in a 25% increase in treatment efficacy and patient satisfaction ratings
- Demonstrated a strong dedication to continuous learning by investing over 400 hours in self-directed study and research to enhance knowledge of emerging technologies and practical skills
- Applied proficiency in data analysis through systematic organization and accurate documentation of over 100 patient records, highlighting strong organizational skills for efficient data management

## EDUCATION

### Tech Elevator | National Live Remote

Oct '23 - Jan '24

Full-stack Java coding bootcamp with 800+ hours of application and development of dynamic web-based software systems

### CS50's Intro to Computer Science | HarvardX

Sep '23 - Oct '23

Introduction course covering algorithmic thinking, efficient problem-solving, and various programming concepts in languages like C, Python, SQL, JavaScript, CSS, and HTML.

### Python for Everybody | Coursera

Jun '23 - Aug '23

Fundamental programming course teaching data structures, networked APIs, and databases, using Python.

### Thomas Jefferson University | Philadelphia, PA

Aug '20 - May '23

Completed 100+ college credits toward a BS in Exercise Science to Doctor of Physical Therapy (3+3)
