PROFESSIONAL SUMMARY

Adaptable software engineer professional bringing a dynamic skill set and dedication to solving problems. Always striving to foster collaboration, and innovation while continuously seeking opportunities to cultivate professional and personal growth in a Java developer role.

TECHNICAL SKILLS

Java, HTML, CSS, JavaScript, Python, C, Spring Boot, Vue.js, React, JDBC, Table Design, SQL, PostgreSQL, E/R diagrams, Agile, Unit Testing (JUnit), Integration Testing, Git, IntelliJ

TECHNICAL EXPERIENCE/PROJECTS

Medical Scheduling App

Comprehensive platform developed in an agile environment that connects doctors, pharmacists, and patients. Key features include online scheduling, appointment management, and transparent prescription cost tracking. The user interactions are powered by Vue.js, while the backend utilizes Java with the Spring MVC model and integrates smoothly with PostgreSQL using JDBC API for efficient database operations.

Portfolio Website

Front-end portfolio site with easy navigation via a top bar, seamlessly transitioning between profile, about, experiences, skills, and contact sections. Crafted with HTML elements and attributes for structured efficiency, and CSS with flexbox for smooth layout design, ensuring user-friendly browsing.

TEemo Payment App

Online payment service designed with Java, Spring Boot, and PostgreSQL, enabling users to transfer 'TE bucks' among friends. This platform empowers users to request and send money, while providing easy access to transaction history, all supported by a RESTful API server and command-line application.

WORK EXPERIENCE

Barista Feb '23 - Oct '23

Starbucks | Bryn Mawr, PA

- Elevated the craft of beverage preparation, skillfully handcrafting over 200 unique drinks each month to provide customers with an immersive and personalized barista experience
- Implemented a systematic inventory management approach, closely monitoring levels and promptly restocking supplies, resulting in a 10% decrease in waste and a 15% reduction in inventory-related errors

Physical Therapy Intern Jul '22 - Feb '23

Einstein Medical Center | Philadelphia, PA

- Applied data analysis skills to organize and accurately document over 100 patient records, enhancing data integrity and streamlining processes. Demonstrates proficiency in efficient data management
- Demonstrated a strong dedication to continuous learning by investing over 400 hours in self-directed study and research to enhance knowledge of emerging technologies and practical skills
- Facilitated the development of patient treatment plans alongside a team of professionals, employing an innovative approach that significantly boosted treatment efficiency and satisfaction ratings

EDUCATION

Tech Elevator | National Live Remote Oct '23 - Jan '24

Full-stack Java coding bootcamp with 800+ hours of application and development of dynamic software

Thomas Jefferson University | Philadelphia, PA Aug '20 - May '23

Completed 100+ college credits toward a BS in Exercise Science to Doctor of Physical Therapy (3+3)
